

What We Do:

Welcome to our energetic and joyful three-year-old classroom! 🎉 Here, little learners dive into a theme-based, hands-on curriculum that keeps their minds curious and their bodies moving.

Each day is filled with exciting activities—story time for magical adventures, learning centers for exploration, and outside time where climbing and running become their favorite ways to strengthen their growing bodies! 🌳🧒

We sprinkle in letters and numbers, making counting a fun part of the day. Sorting objects by color, shape, and size helps build important thinking skills, and little hands get lots of practice with cutting, writing, and crafting—experimenting and discovering along the way! ✂️✏️

As they grow in independence, we guide them in personal care routines and encourage them to use their words to solve disagreements with kindness. It's a world of learning, movement, and play—all wrapped up in a nurturing and engaging environment! 💛🌟

Please feel free to call or email us to schedule a tour or ask any questions.

"Where big ideas happen in little hands!"

Alligators Three-year-olds

Welcome to the Alligators class—where little learners become big explorers! 🦎🌟 Here, we dive into exciting discoveries, get lost in wonderful stories, unleash our creativity through art, and grow stronger in labeling and managing our emotions. It's a playful journey of learning, laughter, and lots of fun! 💚

Developmental Milestones

Three-year-olds are growing and learning so much every day.

At this stage:

- They show affection to friends with smiles and hugs.
- Imaginative play becomes a favorite activity, as they pretend with dolls, stuffed animals, and people.
- Understanding of sharing develops—they start recognizing the difference between "mine" and "yours" and practice taking turns during play.
- Changes in routine can sometimes feel tricky, and emotions range from happiness and excitement to frustration and anger.
- Their language skills are expanding, allowing them to speak in short sentences, tell simple stories, sing songs, and remember fun rhymes.
- Independence grows as they explore buttons, levers, and moving parts, figuring out how things work.
- Physically, they become stronger and more coordinated, climbing well, running with ease, and riding tricycles.

This is an exciting time of discovery and growth, filled with curiosity and playful learning.

🐊 Alligator Updates! 🐊

Our little Alligators are working hard on potty training—way to go! To keep them comfy and confident, please send extra pairs of clothes.

While we love all things fun, toys from home should stay home unless a teacher gives special permission.

However, one snuggly stuffed friend is welcome! Please label it with your child's name so it stays safe.

Bringing food from home? No problem! Just check in with the director or office staff to make sure everything is good to go.

Thanks for your support—we're excited for another great adventure in the Alligator Room! 🐊❤️

Positive Parenting Tips

📖 Growing, Learning, and Playing!

Every little moment helps shape a child's world.

- Snuggle up with a good book and spark their love for reading—trips to the library or bookstore make it even more magical!
- Let them lend a helping hand with simple chores—big smiles come from little accomplishments!
- Schedule playdates with friends playing isn't just fun—it's the perfect way to learn about sharing and friendship.
- Consistency is key when guiding behavior; show them what you expect, and when saying "no," offer a helpful alternative so they know what to do instead.
- When big emotions take over, walk them through problem-solving steps with patience and care.
- Safe choices empower little ones to make decisions with confidence. And chatting in full sentences with rich vocabulary helps build strong language skills—positive modeling makes all the difference!

Every day is a new adventure in learning, growing, and exploring! ❤️
